INSTRUCTIONS FOR USE OF CLIMBING SHOES

CHOICE OF THE SHOES

These shoes are made solely for rock climbing and climbing on artificial climbing walls. Use the shoes for the intended purpose only. To ensure proper fit, please carefully choose your correct size and the type that fits you the best.

GENERAL INFORMATIONS

Put the shoes on with continuous movement while pulling the heel loops. Fully lace the shoes prior to using them to avoid foot movement inside of the shoe which can damage the insole. Complete lacing your shoes to the last hole will also help to prevent damaging the loops. Do not depress the heel part of the shoes. Shoes are not made for use in humid or wet conditions. Shoes without lining, lining leather or leather insole may lightly discolour in contact with naturally warm and wet feet. Avoid longtime contact of the rubber parts with skin and mouth. Protect your shoes against chemicals and sharp objects. In case of mechanical damage, repair the shoes prior to next use.

MAINTENANCE

Clean, dry and expose the shoes to the fresh air after each use. Do not put them into airtight packages. Wet shoes should not be dried by direct exposure to the heat source or sun shining. Before drying straighten the upper part of the shoe or fill it with absorbent material such as newspapers. Clean the dirty shoes with wet rag. Shoes can not be machine washed or chemically cleaned.

ATTENTION

Frequent use of the shoes for their intended purpose decreases their useful life. Duration of warranty is not the same as lifespan of the shoes. The lifespan can be used up before end of warranty period because of the fact that every climber uses his shoes with different intensity. Using damaged shoes can lead to deepening their defect or their degradation and may be seen as a reason not to accept the complaint. For the purpose of complaint, the shoes have to be delivered clean, dry and with the bill proving when and where they were purchased.

Produkte verlassen, verantwortlich. Wir helfen ihnen, höhere Ziele zu erreichen und sicherer nach oben zu gelangen. Ihre Freude und Erlebnisse bei der Eroberung vertikaler Welten sind für uns die größte Belohnung.

EN

Everything we do is connected to our love of climbing, rocks and the outdoors. We share the same desire for beauty and perfection and the need to constantly improve our performance, equipment and ourselves. Climbing is our passion. Quality, improved safety and cleaner design of climbing equipment represent a challenge and an opportunity for further work for us. We feel responsible toward climbers, friends and customers who rely on our products at all times, wherever they are. We help them to reach higher and climb to the top safer. The joy and adventures they experience when conquering vertical worlds are our biggest reward.
